WICHE
Improving Education in The West

WICHE, the Western Interstate Commission for Higher Education, is a nonprofit regional organization. It helps the thirteen member states to work together to provide high-quality, cost-effective programs to meet the education and manpower needs of the West. Member states are Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. WICHE's Information Clearinghouse has initiated this Information Series to provide assistance to higher education and government policy makers in the West.

Foreword

This report provides an overview of the changes in tuition and fee levels at public colleges and universities from academic year 1981-82 to 1982-83 and provides specific institution-by-institution data for the previous three academic years. For the last two years WICHE has addressed the broader topic of state policies and procedures for setting tuition and fees and the need for policies to guide the rational adjustment of student charges from year to year.* In an effort to eliminate the repetition of information detailing state policies and procedures for setting student charges, this report concentrates on providing an update on policy changes and the resulting levels of student charges. We refer the reader to our earlier reports for greater detail on state policy and practices.

This report is based on data supplied by the staff of state-level governing, coordinating, and supervisory boards in each western state. We extend our sincere thanks to these individuals, who are listed on the following pages, for their time and effort. WICHE is responsible, however, for the contents of this report. Please address any inquiries to the WICHE Information Clearinghouse, P.O. Drawer P, Boulder, Colorado 80302, telephone (303) 497-0221.

1. Tuition and Fees: 1982-83 Overview

Average Tuition and Fees at State Supported Four-Year Colleges and Universities

	1981-82	1982-83	One Year Increase
Residents			
Undergraduate Students	$ 720	$ 834	15.8%
Graduate Students	808	963	19.2%
Nonresidents			
Undergraduate Students	$2,842	$3,164	11.3%
Graduate Students	2,954	3,321	12.4%

The figures above represent averages of tuition and fees at 87 state supported four-year colleges and unviersities in the West. In some states, fiscal difficulties triggered sharp increases. In a few cases, tuition surcharges were imposed in both academic years. The increase in resident graduate tuition at a greater pace than undergraduate tuition was influenced heavily by large increases in the state of Washington, which instituted a new tuition-setting mechanism. While regionwide averages are indicative of trends, they tend to mask the variations among the states and institutional groupings. They are discussed in more detail later in the report.

Impact of State Fiscal Constraints

Several western states increased their tuition and fee charges sharply as direct outgrowths of fiscal problems. In California, which saw the imposition of the tuition and fee surcharges midway through the 1981-82 academic year, both the University of California regents and the California

State University trustees approved sizable increases in student fees. (Note that neither system charges resident tuition, although both systems impose a uniform additional charge called nonresident tuition.) The state university trustees instituted a new fee, which for the first time covers general costs, not specific items or services. The fee charged to all students is $150 per academic year for a full-time student. While not enacting any formal measures or policy changes, the University of California regents approved fee increases that averaged approximately 20 percent for resident students.

California, through the California Postsecondary Education Commission (CPEC), the university systems, and the legislature, is still studying and debating issues related to setting tuition and fees. Supplemental language to the 1982-83 budget act requests CPEC to report and make recommendations on a number of student fee and financial aid issues by December 1, 1982. Among the issues under study are: (a) the activities that will be funded with revenues from student charges, (b) the impact that student charges at one segment (university system) have on other segments, (c) the appropriate level of student charges for each segment, and (d) the level of additional financial aid required to maintain student access at various levels of student charges. In addition, the legislature requested that charges for graduate and professional post-baccalaureate programs be studied, with attention given to cost differences and other pertinent factors.

In Idaho, which has endured several consecutive years of economic and fiscal problems, the State Board of Education imposed a one-time surcharge of $50 per semester for resident students and $100 per semester for nonresidents for the 1982-83 academic year. The surcharges were ordered in June following a declaration of financial emergency by the board, which governs the state's four senior institutions.

Oregon, which initiated a $49 per term surcharge in January 1982, is continuing it through the 1982-83 school year.

Other Changes

The University of Alaska adopted a new tuition and fee schedule that raises the number of credits charged on a per credit basis from eight to twelve per semester, which amounts to a 50 percent increase in tuition for full-time students. Formerly, students taking more than eight credit hours paid a flat fee equal to the per credit charge multiplied by eight. For 1982-83 twelve credit hours per term will be used as the flat rate fee.

Washington's 1982 legislature extended to the graduate level the concept of relating undergraduate tuition and fee charges to the cost of instruction. Prior to 1982-83 graduate tuition rates were set at 1.2 times undergraduate rates, which were based on a computation of undergraduate instructional costs. For 1982-83 and future rate determinations, tuition rates for resident graduate students will be determined by taking 23 percent of the respective calculated per-student costs for graduate instruction at both the doctoral degree granting universities and the regional universities. Nonresident graduate students will pay 60 percent of the calculated instructional costs

at the doctoral universities and 75 percent at the regional universities and The Evergreen State College. This change in policy has the effect of significantly increasing resident and nonresident graduate student rates at the doctoral universities, and resident rates for graduate students at the regional universities and The Evergreen State College. Increases in nonresident graduate rates at the regional universities and The Evergreen State College are more modest, since the prior approach approximated the 75 percent relationship adopted by the 1982 Legislature. Increases in undergraduate rates reflect the second year of a two-year phase-in on rates that were established during the 1981 Legislative Session.

2. Recent Trends in Tuition and Fee Setting

This section provides a brief overview of the differences in student charges among the western states, the changes in these fees from 1979-80 to 1982-83, and the differentials charged to graduate and nonresident students. The summary data presented in this section were taken from tables 6 and 7, which appear in the appendix. We urge the reader to examine these tables, which provide institution-by-institution detail, to obtain a more complete view of interstate and interinstitutional variations in tuition and fee rates. The data presented in this section are combined figures for tuition and fees, which for the sake of brevity will be referred to as "student charges," or, simply, "charges." Because of the variations in community college finance among the states, this discussion concentrates solely on four-year colleges and universities. Student charges at two-year colleges are listed by institution in table 9, which appears in the appendix.

Student Charges

Earlier discussion has used the terms "tuition," "tuition and fees," and "student charges" interchangeably. In essence, they are the basic comprehensive charges that all students are required to pay as a condition of enrollment in the institution, varying in amount on the basis of the credit-hour load for which the student is enrolled, the student's residency, and in some cases, classification as an undergraduate or a graduate student.

To be more precise, the term "tuition" refers to that portion of the basic comprehensive charge whose revenue is used, along with state appropriations and other unrestricted institutional receipts, to fund portions of the budget relating to student education (as opposed to research, public service, auxiliary activities, and student financial aid). In some states tuition and fees are treated as revenue to the state general fund. These charges may or may not be known as tuition. Other designations include registration fee, educational fee, and incidental fee.

In some western states nonresident students pay a charge that is called nonresident tuition, but resident students pay no charge called tuition. Especially in California and Idaho, the imposing of a charge called tuition on resident students is viewed as a fundamental departure from long-established public policy; in Idaho, it is a constitutional question. In both states,

however, resident as well as nonresident students pay charges called fees, and a portion of the proceeds of these fees is used to fund activities relating to educational and general expenditures. This portion comes within the definition of "tuition" used in the balance of the report.

The term "required fees" refers to those fees charged all students to fund various specified activities and purposes generally separate from the activities for which tuition funds are used. Examples of such purposes are student activities, athletics, student health services, student union operations, and debt service.

It is common, though not universally practiced, to state student charges in terms of a comprehensive fee combining "tuition" and "required fees" as defined here. For this reason the data and much of the discussion in this report combine tuition and fees. The discussion that follows refers to combined tuition and fees.

From the standpoint of the student, it may be of no practical consequence whether the required charges are tuition or fees or both. From the perspective of the state, however, there are important differences. The portion defined here as tuition usually has a direct bearing on the amount of state appropriations required by the institution or, in some states, the amount of revenue to the state general fund. Fees, in contrast, are generally retained by the campus to fund the activities for which they are levied.

Changes in Tuition and Fee Levels

Tables 1 through 4 provide a summary of average charges* for resident and nonresident undergraduate and graduate students at public four-year colleges and universities in the West. Table 1 reports these figures for undergraduate resident students for 1979-80, 1981-82, and 1982-83 along with one-year (1981-82 to 1982-83) and three-year (1979-80 to 1982-83) percentage changes. One way to view the latter percentage change is to compare the difference between the tuition paid by a hypothetical freshman in 1979-80 and the tuition paid by the same student as a senior during the current school year. Table 2 reports the same averages for nonresident undergraduates; tables 3 and 4 report on resident and nonresident graduate students respectively.

The data presented in these tables reveal the following:

- Despite the uncertain economic and fiscal conditions in many states, tuition increases from 1981-82 to 1982-83 averaged between 10 and 20 percent in most cases and for most categories of students. In several states or institutional groupings, tuition increases were less than 10 percent.

- Overall 1982-83 resident undergraduate tuition in the West was up 15.8 percent from the previous year. As noted earlier, increases in California, Alaska, and Idaho helped to raise this average. Nationwide, as reported by the College Scholarship Service, student charges increased 20.1 percent at public four-year colleges and universities.

*The arithmetic mean of the separate institutional charges, not the amounts paid by the "average" student.

Table 1

Average Undergraduate Resident Tuition and Required Fees
at Public Four-Year Institutions in the West by State
1979-80, 1981-82, and 1982-83

WASHINGTON[d]					
University of Washington and Washington State University (2)	771	1239	1701	37.3%	120.6%
Regional Universities and The Evergreen State College (3, 4)	684	996	1320	32.5%	93.0%
WYOMING (1)	592	592	616	4.1%	4.1%
Total West[e] (78, 79)[f]	602	808	963	19.2%	60.0%

[a]The University of Colorado Health Sciences Center is excluded from these figures.

[b]Unlike other western states, Nevada charges a flat hourly rate. In making comparisons, the reader should note that Nevada's use of an eight credit-hour load on which these figures are based is probably lower than the average credit-hour load of students paying the full-time rate in other states.

[c]The Oregon Health Sciences University is excluded from these figures.

[d]The Evergreen State College did not have any graduate programs in 1979-80, so the figures for that year include only the three regional universities. Because student charges at all four institutions are the same, the data remains comparable across all years.

[e]This figure is the average of all institutional figures reported in table 7; it does not represent the charges paid by the "average" student.

[f]The average is computed on data from 78 institutions in 1979-80 and 79 institutions in 1981-82 and 1982-83. (The Evergreen State College in Washington had no graduate programs in 1979-80.)

NOTES: All tuition and required fees are for a regular academic year--three quarters, two semesters, or two trimesters.

Data are derived from table 7, which gives complete data for each western institution.

Table 4

WYOMING (1)	1720	1878	2076	10.5%	20.7%
Total West[e] (78, 79)[f]	2217	2954	3321	12.4%	49.8%

[a]The University of Colorado Health Sciences Center is excluded from these figures.

[b]Unlike other western states, Nevada charges a flat hourly rate. In making comparisons, the reader should note that Nevada's use of an eight-hour load on which these figures are based is probably lower than the average credit-hour load of students paying the full-time rate in other states.

[c]The Oregon Health Sciences University is excluded from these figures.

[d]The Evergreen State College did not have any graduate programs in 1979-80, so the figures for that year include only the three regional universities. Because student charges at all four institutions are the same, the data remains comparable across all years.

[e]This figure is the average of all institutional figures reported in table 7. It does not represent the charges paid by the "average" student.

[f]The average is computed on data from 78 institutions in 1979-80 and 79 institutions in 1981-82 and 1982-83. (The Evergreen State College in Washington had no graduate programs in 1979-80.)

NOTES: All tuition and required fees are for a regular academic year--three quarters, two semesters, or two trimesters.

Data are derived from table 7, which gives complete data for each western institution.

- Institutions in eight of the thirteen western states charge less than the $834 average tuition for undergraduate resident students.

- Undergraduate nonresident charges increased 11.3 percent to an average of $3,164. In many states the lower percentage increase for nonresident students is accounted for by the imposition of a flat charge that was added to resident tuition after the latter was adjusted for 1982-83.

- Percentage increases in undergraduate tuition over the last three years have averaged 16-18 percent per year. Idaho, Oregon, California, and Washington--in part related to their fiscal crises--have exceeded these averages. Alaska, with its large one-year increase in 1982-83 also exceeded these averages.

- The percentage change figures for three years add perspective to the single year figures. For example, moderate single year percentage increases in president undergraduate tuition in Washington and Oregon should not obscure the much greater increases for the three-year period 1979-80 to 1982-83.

- Percentage increase figures may be misleading if the reader does not consider the actual dollar amounts charged. Thus, for example, despite a 43 percent increase this year, Alaska's charges are only slightly more than half of Oregon's.

- Graduate tuition increases averaged 19.2 percent for residents and 12.4 percent for nonresidents. Major increases occurred in Alaska, Washington, and at the California State University.

- On the average, these increases were less than the increases reported the previous year.

Bracket Creep

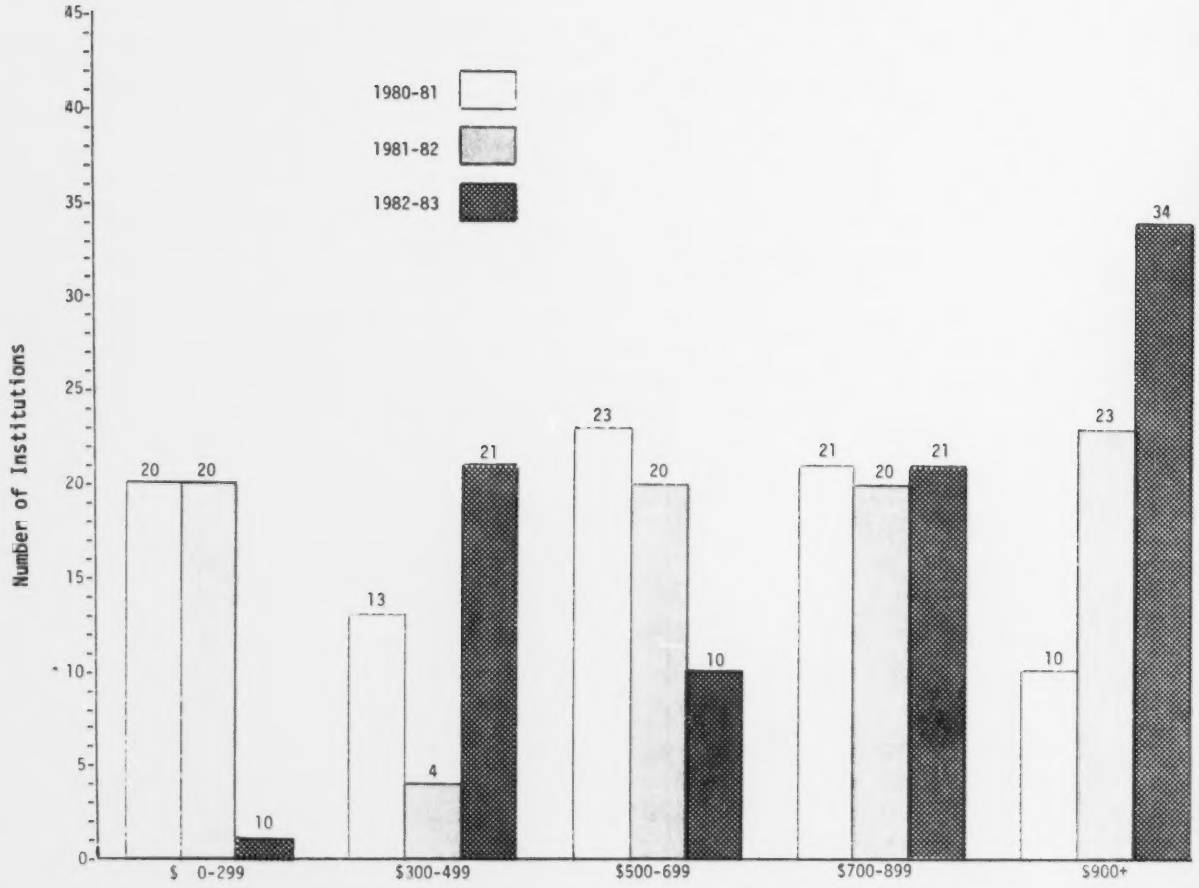
As tuition and fee charges rise each year, more and more institutions fall into the "moderate" and "high" tuition categories (relatively speaking for public institutions in the West) and correspondingly fewer institutions remain in the "low" tuition category. Figures 1 and 2 demonstrate this phenomenon for the last three years.

- The number of institutions charging undergraduate resident tuition and fees in excess of $900 grew to 34 from 23 in 1981-82. The next greatest number of institutions falls in the $700-899 range.

- Correspondingly, the largest segment of institutions now charge undergraduate nonresident students more than $3,500. The number of institutions in this range increased from 16 in 1981-82 to 40 in 1982-83.

Figure 1

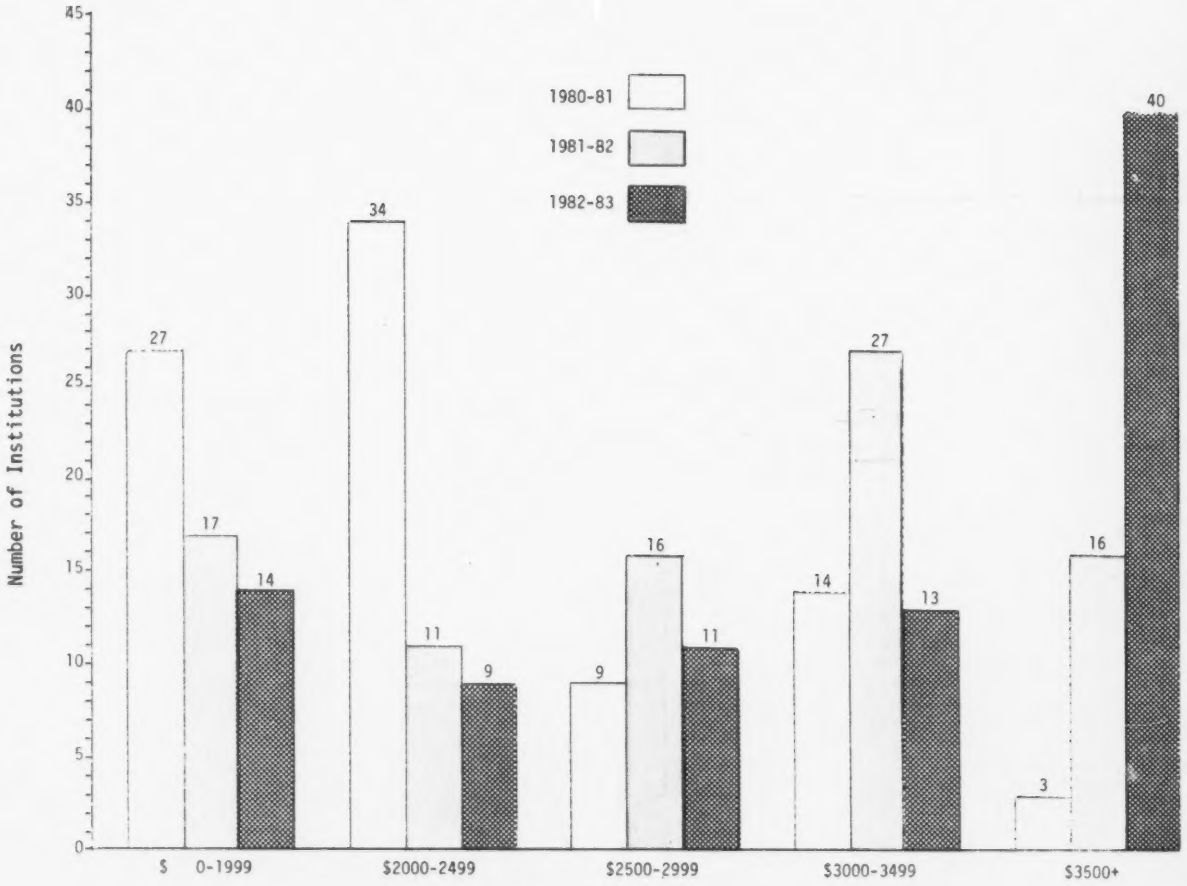
Undergraduate Resident Tuition and Required Fees in the West
1980-81, 1981-82, and 1982-83



NOTE: This figure was derived from table 6 in the appendix. Institutions are grouped by tuition and required fees levels.

Figure 2

Undergraduate Nonresident Tuition and Required Fees in the West
1980-81, 1981-82, and 1982-83



NOTE: This figure was derived from table 6 in the appendix. Institutions are grouped by tuition and required fees levels.

Tuition and Fees by Type of Institution

Table 5 groups all western public four-year institutions by their Carnegie Classification. This classification, which was developed in 1976 by the Carnegie Council on Policy Studies in Higher Education, attempts to identify peer groups of institutions based on selected attributes like highest degree offered, volume of research, size, and complexity.

- As one might expect, student charges tend to be higher in the research universities than in other categories of institutions.
- Reference to the institutional data in table 8 reveals that a single institution, the Colorado School of Mines, accounts for the high average (i.e., mean) charges under the category Schools of Engineering and Technology.
- Similarly, the 19 California State University campuses listed in table 9 affect both the mean and median tuition for Comprehensive Universities and Colleges I.

Table 5

Summary of Tuition and Required Fees at
Public Four-Year Institutions in the West
By Carnegie Classification
1982-83

UNDERGRADUATE

Carnegie Classification	Number of Institutions	Resident Range	Resident Mean	Resident Median	Nonresident Range	Nonresident Mean	Nonresident Median

[d] Includes tuition surcharge of $50 per semester for residents, $100 per semester for nonresidents (1982-83).

[e] Western Montana College changed from a quarter system to a semester system in the fall of 1981.

[f] Revised 1981-82 resident undergraduate and graduate tuition and required fees includes $49 per term surcharge for winter and spring terms of 1981-82. This surcharge is also in effect for all three terms of 1982-83.

[g] The Evergreen State College had no graduate programs until 1981-82.

[a]Tuition and fee structure was changed by the Board of Regents in July 1982.

[b]Juneau-Douglas Community College is now part of the University of Alaska, Juneau.

[c]Classes at South Mountain Community College began in 1980-81.

[d]California community colleges do not charge tuition or other educational fees. The community college districts have the authority to charge eighteen different fees besides nonresident tuition. In those districts that have instituted required fees for services such as parking and health services, fees range from approximately $2 to $40 per academic year. Data for 1982-83 fees in California community colleges was not available at publication time.

SOURCE: The tuition and fee data for 1979-80 through 1981-82 are reprinted from the 1981 WICHE report Tuition and Fees in Public Higher Education in the West. The 1981-82 data were provided by the statewide governing board or supervisory agency in each state.

NOTE: The amounts shown represent tuition and required fees paid by a full-time resident student for a full academic year (three quarters, two semesters, two trimesters). Tuition is the minimum tuition charged, that is for a state, district or county resident. Required fees include charges other than tuition which a majority of full-time students are required to pay. (Optional fees and books and supplies are not included.)

[e]Classes at Pueblo Vocational Community College began in 1979-80.

[f]Decrease in tuition and fees in 1979-80 reflects a redefinition of FTE student from 16 credit hours per semester to 15. Charge per credit hour remained the same.

[g]The figures shown for New Mexico Military Institute exclude required fees of room and board, laundry costs and personal account deposits. These fees have been exlcuded to provide greater comparablity to other institutions.

[h]New Mexico State University, San Juan Branch, became an independent junior college July 1, 1982.

[i]Classes at the University of New Mexico, Los Alamos Campus, began in 1980-81.

[j]Classes at the University of New Mexico, Valencia County Branch, began in 1981-82.

[k] Classes at Tillamook Bay Area Education District began in 1981-82.

[l] For 15 credit hours per quarter.

WICHE

Improving Education In The West

WICHE, the Western Interstate Commission for Higher Education, is a nonprofit regional organization. It helps the thirteen member states to work together to provide high-quality, cost-effective programs to meet the education and manpower needs of the West. Member states are Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. WICHE's Information Clearinghouse has initiated this Information Series to provide assistance to higher education and governmental policy makers in the West.
